

Billycoin (BYC)

Whitepaper

1. Introduction

Billycoin (BYC) is more than just another token. It is a movement, a community-driven digital asset built on the Binance Smart Chain (BSC). With a focus on organic growth, transparent tokenomics, and a strong believer base, Billycoin is designed to bring back the true spirit of crypto communities.

Unlike hype-driven projects that rely on influencers and pump-and-dump tactics, Billycoin thrives on authenticity. We are building the Billy Gang – a family of believers and BYC Millionaires who will grow with the token.
